"Serenita Series"

Angelonia angustifolia Serenita

This care-free, continuous bloomer is well-suited to landscapes, gardens and mixed containers.

"Bullet-proof" bedding, heat-loving, with low-water needs. Easy-care, Serenita stands tough through all kinds of conditions. More compact and manageable than Serena on the bench and in the garden. Grows in full sun(at least 6 hours)12-14" tall and 12-14" wide.

Begonias

"Dragon Wing" Begonias

Begonia X hybrida
(Available Jan-May & Aug-Dec)

Dragon Wing™ delivers excellent garden performance across a wide range of conditions. With a unique beautiful arching, pendulous habit, this spectacular plant adapts well to hanging baskets, large containers and in-ground plantings. Outstanding heat tolerance provides lush, vigorous growth. Dragon Wing offers a dramatically different look from standard begonias. Dragon Wing grows 12 to 15" tall and spreads up to 18".

Begonia Odorata "Alba"

This begonia is noted for its ability to handle strong sun, while doing just as well in the shade. It features white flowers with a delicate fragrance and glossy green foliage. Grows up to 3' tall and 3' wide.

Bush Daisy Athena Sun (Euryops)

Euryops pectinatus

Euryops, yellow bush daisy, or African Yellow Daisy is a marvelous addition to any garden that has a well-drained, full sun situation. This is a plant that provides sunny, yellow daisy-like flower color against a mat of appealing finely cut green foliage all season long. It is a tough plant that survives all but the most extreme warm weather conditions including moderate drought. Grows 14-18" tall. Not cold hardy.

Cannas "Cannova & Pacific Series"

Canna x generalis

Cannova Series Cannas are dwarf from seed and can take full sun, high temperatures and grows to 30-40" in height with 3-4" flowers. Everyone's favorite for garden-size Cannas that bloom in no time. The compact size, large blooms, and ready flowering makes these plants stand out in the sunny garden.

Caladiums

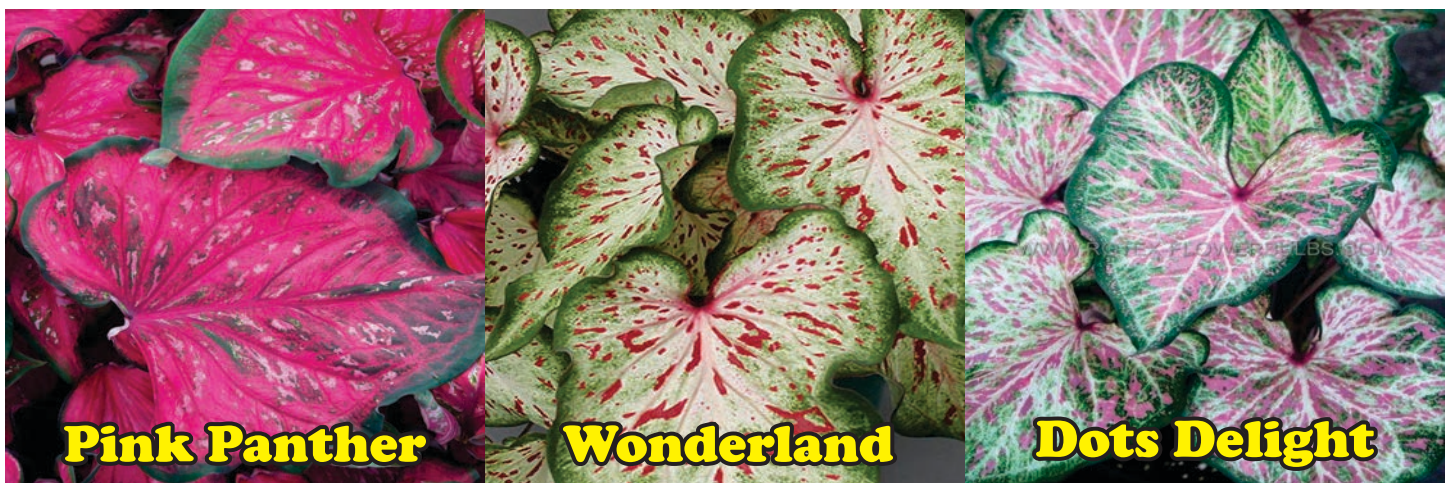

Fancy Leaf Varieties

Fancy leaf caladiums tend to be taller and have larger heart shape leaves. Grow 12-20" tall.
The varieties below can grow in full sun to partial shade.

Strap Leaf Varieties

Strap Leaf varieties tend to be more compact than Fancy leaf and also have smaller leaves. Strap Leaf caladiums can withstand more sunlight and typically last longer. They do require water and don't like to dry out. Grows 8-16".

Coleus (Sterile)

Solenostemon scutellarioides

These vegetative sterile coleus are as durable as it gets compared to seed varieties. Now breeders have successfully created varieties that can be grown in the sunniest spot in the garden with wonderful bright colors. Please note that some coleus colors can change color depending on amount of sunlight.

Coleus (Sterile) cont.....

Coleus Flamethrower Series

These exquisite coleus have multi-colored foliage on an upright, compact plant that tolerates full sun and shade. Use as a single or mixed color planting for stunning color and texture to edge a border, or as a container specimen. Perfect for high-impact in the heat of summer. Grows 18 to 24 in. tall and 16 to 18 in. wide.

Crossandra

"Orange Marmalade"

Crossandra infundibuliformis

Heat-tolerant Crossandra Marmalade blooms continuously in full sun to partial shade making it a premium landscape plant in tropical and semi-tropical areas. Grows 14-24".

Cuphea Floriglory

Cuphea hyssopifolia

Cuphea, commonly known as Mexican Heather, is an ideal plant for borders, mass plantings and containers. FloriGlory was highly praised by the AAS Judges for its larger flowers, impressive number of flowers and the darker, more intensely colored magenta flowers. The dark green foliage complement the flowers and really makes a statement for this new AAS Winner. With FloriGlory your customers will be delighted with the compact (10-12 inch) size, longer flowering time, heat and weather tolerance.

Celosia Dragons Breath

Celosia argentea plumosa

The industry cannot get enough of the unique green-red foliage and blazing-red, long-lasting flowers of Dragon's Breath Red celosia. Dragon's Breath is great in containers, beds and large landscapes. Dragon's Breath exhibits even more red foliage and flowers under adverse garden conditions like heat, humidity and infrequent watering. Fantastic performer under hot and humid conditions that make a perfect choice for landscaping for bright red color with gorgeous flowering plumes. Minimal nitrogen needed during growing period, less fertilizer and irrigation needed. Grows up to 24" in height and 16" in width and requires full sun. **Limited Supply.**

Duranta "Gold Mound"

Duranta repens

An award-winning Landscape Elite™ upright shrub with bright yellow and green foliage that is a perfect addition to any landscape or containers. Variegated yellow and green foliage. Light blue tubular flowers will appear from July to

Evolvulus (Blue Daze)

Evolvulus glomeratus

Evolvulus, or blue daze, is an evergreen subshrub that grows in a low, spreading mound, up to 2-3 ft. in diameter, but no more than 1 ft. tall. Evolvulus grows well in full sun & in poor sandy soils that are well drained. It cannot tolerate wet soils at all, and very rainy periods or overwatering will cause fungus problems and lead to premature death.

Ipomoea

Marguerite

Ipomoea batatas

Bright foliage provides a light color for this trailing vine. An excellent foliage contrast in containers, baskets, window boxes or garden beds. Produces small white flowers in warm tropical conditions, but is mainly sold as a foliage plant for accent. Grows 10-12" tall and 24-36" wide. Full Sun.

Spotlight Series

The first compact ipomoea series offers popular heart and cut-shaped leaf varieties! Spotlight's compact, naturally branched habit is ideal for packs and small pots. Great for mixes too. The series features bold, eye-catching colors and holds its color in extreme heat. Grows 8-10" in height and 16-20" in width. It is a great compact solution for southern regions.

Black Heart

Lime Heart

Red Heart

Lantana

Lantana Camara

All Lantanas require full sun.

Bandanas

Lantana Bandanas are a series of heat-tolerant, drought-resistant plants that are popular for their vibrant flowers and low maintenance requirements. The plants typically grow to a height of 12 to 26 inches and spread about 12 to 24 inches wide. They attract pollinators such as butterflies and hummingbirds while being resistant to deer.

Cherry Sunrise

Gold

White

Bandoleros

Lantana Bandolero™ is a cultivar of the genus Lantana, specifically known for its vibrant flowers and heat tolerance. This plant is characterized by its compact growth habit, typically reaching a height of 18 to 26 inches and a width of 18 to 27 inches.

Lychee

Hot Blooded

Lantana Hot Blooded is a specific cultivar of the lantana plant, known for its vibrant and attractive flowers. This variety is particularly popular in landscaping due to its colorful blooms and low maintenance requirements. Grows to be about 18 inches tall at maturity, with a spread of approximately 28 inches.

Bandolistas

Lantana Bandolista plants typically exhibit a semi-trailing or mounding growth habit. They can reach heights of 12 to 24 inches and spread approximately 18 to 30 inches. This makes them ideal for hanging baskets, window boxes, and as ground cover in garden beds.

Mango

Pineapple

Red Chili

Marigolds

Marigolds "Happy Series" (French)

Happy marigold is a genetically dwarf type to withstand heat in the landscape. More uniform between the colors with the extra vigor needed to perform in the landscape. Flower size is also larger and just the right amount of vigor to perform beautifully in hot, harsh garden conditions. Grows 6-7" in height and 6-8" in width. Full sun.

Mona Lavender

Plectranthus

Very free-flowering with excellent heat and drought tolerance, the plants put on an intense color display in mixed containers and landscapes. Upright plants feature flower spikes covered with dark lavender florets similar to mini-orchids, over fuzzy, dark green foliage that is a rich purple color on the underside. Grows 12-16" tall and 24" wide. Grows in partial shade.

Pentas

Pentas lanceolata

"Northern Lights"

'Northern Lights Lavender' is a true breeding breakthrough in Pentas. More tolerant to cooler growing temperatures, more tolerant to low pH levels and equally free flowering in hot or cool landscape settings makes 'Northern Lights Lavender' a standout in traditional southern locales and brings a new dimension to northern settings. Grows in full sun to partial shade. Grows 14-24" tall and 12-24" wide.

Pentas

“Butterfly Series Pentas”

Pentas lanceolata

With its hybrid vigor, Butterfly produces larger flowers and umbels, withstands stressful conditions and shows better garden performance than other commercial seed varieties. Trials show it is about 20% larger than other seed varieties. Planted outdoors, Butterfly grows fast and finishes fuller and larger. Grows 12- 22” tall and 12-16” wide. Full sun to partial shade.

Deep Pink

Deep Rose

Orchid

Cherry Red

White

“Dwarf Pentas”

These dwarf pentas are well-branched with a compact habit and also has eliminated the cyclic blooming. Follow-up blooms don't eclipse the prior flush, so plants stay compact. These naturally well branched pentas form mounds of flowers in the garden and blankets containers for highest consumer demand. Height: 12-15", 10-14" spread.

Purslane

"Pazzaz Nano Series"

Pazazz Nano purslane loves tough conditions and showing gorgeous bright-colored flowers in abundance. Pazazz purslane also flower longer during the day compared to others and has mounding habit. Requires full sun, are drought tolerant and loves the heat. Grows 4-6" tall and spreads up to 18".

"Campino" Purslane

Portulaca oleracea

Campino is a unique series with big, abundant bicolor flowers that shine brightly through the heat of summer. Works in poor, dry soils where other plants may struggle. They have a larger flower than other purslane and grow flat like a carpet. Grows up to 4-5" in height and spreads well. Very drought tolerant. Flowers may close on wet and overcast days.

Sedum Angelina

Sedum hybrid

Sedum rupestre 'Angelina' is an evergreen perennial that adds some pizzazz to winter landscapes. This low growing plant performs well in sunny, well-drained spots in the landscape but will also tolerate some shade. In the summer, the foliage is a brilliant chartreuse but after a few cold snaps it takes on a coppery bronze tinge that brightens up winter landscapes.

Sunpatiens

Impatiens x hybrida hort

Sunpatiens are a revolutionary hybrid impatiens that thrives in sun and takes the heat. Sunpatiens are the result of an intense breeding program that has spanned many years and has been tested the world over. Strong weather tolerant plants that hold up well to wind and rain while thicker petals and foliage are less prone to disease. Grows 14-36" tall and wide in the garden.

Salvia Mysty

Salvia longispicata X farinacea

This compact salvia is about 25 to 35% less vigorous than Mystic Spires, making it a better variety for mixes. Covered with true blue flowers all season, the dark green-leaved plants are naturally more compact, well-branched and very free-flowering. Heat-hardy plants are great for late Spring/Summer programs and attracts butterflies. Grows 12-18" tall and 12-18" wide.

Vinca

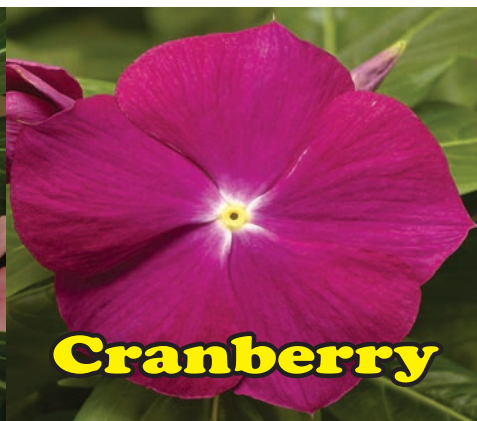

"Cora XDR Series"

Catharanthus roseus

The Cora XDR offers season-long flowering and survival in landscape plantings. Highly resistant to ten of the most virulent isolates of *Phytophthora nicotianae* that cause *Phytophthora* blight on annual vinca. Easier to grow with improved branching, uniformity, and floriferousness. Grows 12-16" high and 12-16" wide. Grows best in full sun. Vinca will need to be mulched as a preventative to keep splashing water from spreading disease such as Aerial Phytophthora.
